

20220421 Hello Ajk!

Asko Korpela: AjkUtopia   

Global World Country Globe

Constitution: At the heart of which is the golden rule of conduct:

Do to another what you want him to do to you.

The laws of the present states are subject to the constitution of the global state.

Introduction of a single currency (Globo) worldwide. **NK**

The social system is democracy at all levels of social decision-making.

The economic system is a social market economy:

prices free according to supply and demand.

Welfare society: Basic income and social security, which account for a third of GDP, are determined by local conditions and production.

Financing: Income taxes are eliminated and the tax is levied on products when the product is transferred from production through the market to the consumer.

The sovereignty of the present states will be abolished and the states will become substates of a global state.

The current military forces will be phased out and replaced by a global police force.

Implementing an unrestricted right of residence.

Awaiting Utopia: Conscription will be abolished and replaced by the obligation for young people to stay, study and practice for several months in a neighboring language area.

Armed control of state borders will be stopped, tourism, trade, cultural exchange and the free flow of information will be honored.

..we live in a global world, where lowering borders is better than raising them. In my opinion, **the nation-state is a Devil's clever invention** to get people to kill each other with machine guns. The cure for this is trade, tourism, sports, the internet, studying the language and culture of the neighbor, a much more reliable guarantee of security than iron on the border.

All in the same boat in the stormy sea of the world

Bumblebees like Evil brats with Guns and wraps rock the boat. The rabbits in China and India are sitting on the stern and just watch as the small are fighting. It would take an angry mother, a social worker, or perhaps an artist, a lyricist, a songwriter to make it clear to all of us what is at stake.

Putin is shooting at his own knee irritated by his opponents. The granary is being burned. Just causing harm to everyone. Is it not now understood that it would be better for all of us if the cow would be milked instead of being killed. A

spoon in a beautiful hand and a common soup to be cooked and food not be poured on the ground! A sweep of a magic pin is needed to change angry faces to smiling and laughing.

Aren't trade and turism even more important than Nato? 🙄 😊

A stick and a gun are waved to Russia. What if you grew a carrot?

Could the consequences taste better to all of us, too!

Now I came up with this: Instead of buying 11 billion worth of useless billion-dollar machines, we buy 1 billion worth of drones that are loaded full of target-worthy facial images of men, women, and children and send them to Russia... and the West alike.

I wonder if the people will not wake up!

TravelChannel

I propose that the following addition be added to the UN Declaration of Human Rights:

All member countries undertake to ensure that a TV channel is maintained for all their citizens, which shows, on a 24/7 basis, at least 12 hours of travel reports dubbed into their own language to all over the world. Showing people in their own environment, in everyday chores, at a party, sights, history, culture. At the same time, trying to reduce programs that show wars, murders, violence...

Now I have an idea: Instead of buying 11 billion worth of useless billion-dollar gadgets, let's buy 1 billion worth of drones, which are loaded full of target-worthy facial images of men, women, and children, and sent to Russia...

Nato-hysteria

❤️ Hello Ajk!
